Experience

Web Scraping Intern — Esours Company

July 2020 – Oct 2020

- Worked on extracting and analyzing data from websites.
- Automated data embedding into Excel sheets using Python.

Software Engineer — SBT Company

May 2021 – Nov 2021

- Designed and developed systems including ERP, Payroll, Beauty Center, Supermarket, and Inventory Management.
- Collaborated in full system development cycles from requirement gathering to delivery.

Software Engineer — Smartly Company

Jan 2022 – July 2022

- Worked on various backend and frontend development tasks.
- Contributed to software planning, coding, and debugging in team projects.

Freelance Project Manager & Consultant

Aug 2023 – Present

- Managed multiple freelance projects from planning to deployment.
- Led and coordinated teams tracked server/domain operations and provided technical consultations.
- Supervised project delivery and offered end-to-end development guidance.

Education

Cairo Higher Institute for Engineering and Computer Science

Sep 2019 – Oct 2023

Projects

[Tehama News app - Backend Developer & Project Supervisor \[Freelance, PHP, Mysql, Laravel\]:](#)

- Designed and implemented robust backend APIs using Laravel to manage multi-language dynamic content, including users, categories, countries, languages, articles, notifications, RSS feeds, roles, AdSense integration, and YouTube video links curated via the admin panel for in-app video display.
- Developed a fully dynamic multilingual system enabling seamless translation and content management across all modules.
- Supervised the project lifecycle from initial planning to deployment, guiding the development team, ensuring quality control, and managing server and application launch.
- Coordinated cross-functional collaboration between developers, designers, and stakeholders to meet project goals and deadlines.
- Implemented scalable and secure backend architecture to ensure optimal performance and data integrity.

[Siasi Social Network app - Backend Developer & Project Supervisor \[Freelance, PHP, Mysql, Laravel\]:](#)

- Analyzed and understood the existing system's database and core algorithm to effectively recreate and optimize backend functionality.
- Developed comprehensive APIs that mirrored the functionality of the original website to support the mobile application.
- Led and coordinated the development team from initial analysis through project completion, ensuring timely delivery and high-quality standards.
- Provided ongoing technical guidance and troubleshooting throughout the project lifecycle to maintain

performance and stability.

Kidflix app – Backend Developer & Project Supervisor [Freelance, PHP, Mysql, Laravel]:

- Developed backend APIs and an admin dashboard for managing age-appropriate video content tailored for children.
- Implemented content categorization and parental control features allowing customized viewing plans based on age groups.
- Ensured secure and efficient management of video data and user interactions through scalable API design.

Payroll System – Developer:

Developed a comprehensive payroll management system to automate employee salary processing and tax calculations.

ERP System – Developer:

Created an enterprise-level ERP system to streamline business operations and resource management.

E-commerce System – Developer:

Built a fully functional online store platform supporting product listings, payments, and order management.

Affiliate System – Developer:

Designed and implemented a referral tracking and commission system to boost sales and partnerships.

Skills

Technical Skills:

- Fullstack Web Development (Frontend & Backend)
- Web Scraping and Automation
- Desktop Application Development
- Database Design & Management (MySQL)
- Version Control (Git)
- RESTful API Design & Integration
- Server Management and Deployment
- Agile Methodologies and Scrum Framework
- Strong knowledge of software engineering concepts including design patterns, architectural patterns, and UML diagrams
- Proficient in algorithms and advanced data structures such as segment trees, disjoint sets, graph traversal, and dynamic programming
- Programming Languages: C#, Python, Javascript, Kotlin, PHP, JavaScript.

Soft Skills:

- Team Collaboration
- Problem Solving
- Fast Learning
- Project Management
- Client Communication
